

BEFORE THE TREATMENT

1. Vacuum all rugs, carpets and furniture, especially between and under cushions. Then seal or dispose of the vacuum bag in an outside receptacle.
2. Clean and clear all floors, even closet floors. Mop all tile and vinyl floors. Sweep all concrete floors.
3. Remove all decorative items, pillows, pet food, water dishes and children's toys from under beds and furniture.
4. Remove all pets. Fish bowls and aquariums may remain if properly covered and the air pump is shut off during treatment, but be sure to ask our professionals for specific directions.
5. Wash or dispose of all pet bedding. If laundering, wash pet bedding separately from other lines.
6. Mow your lawn and make sure everything on the ground outside has been removed.
